

Recovery.

Bruce Hall
Alcohol and Drug Recovery Services

Carolinas Hospital System's dedicated drug and alcohol treatment facility, Bruce Hall, provides inpatient detoxification and rehabilitation treatment for persons with substance abuse problems. The inpatient medical rehabilitation program is an extended care stay, intensive medical level of inpatient care for continued physical and emotional stabilization. This level of care has a focused approach to addressing identified issues that could cause a relapse. Family members are a key element in the patient's recovery process and we encourage them to participate in the family education class, individualized unit sessions and family counseling.

Bruce Hall

Bruce Hall has been in operation for more than 29 years, serving thousands of patients and their families. We offer treatment/education/support for the family and the extended work family as well. We believe that all patients should be respected and include them in all decisions of their treatment.

At Bruce Hall, holistic, individualized treatment includes a patient's family working in conjunction with licensed addiction counselors, certified addiction registered nurses and doctors specializing in addiction care.

Carolinas Hospital System is proud to continue to offer quality detoxification services in the Pee Dee Region.
